"I have managed Harsh directly for all the 3 years he was with Oracle. He has the right attitude to work right from the beginning. Harsh is a quick learner and focus on treating critical issues faster. These are very important traits that anybody who is working on patching should have as the deliverable have a direct and serious customer impact. He always challenges the current way of working things and had on his own come up with automation tools to improve the quality and correctness of the deliverables he has owned. Harsh is extremely hard-working and puts in very long hours to get the job done. He is open to new ideas, escalates issues at the right time and suggests options to resolve issues. Overall he is a very good asset to any engineering team: Highlights of his achievements: Quickly settled in his role, displays high energy and high potential in various tasks assigned. Quick learner, started delivery in short span of time (within 6 months). Consistent in Delivery Excellence – quality and productivity. Very quickly had made remarkable progress on team and client work. Consistently meets / exceeds delivery schedules and targets."

— **Sudha Thazhathaveetil**, *Director, Oracle*, managed Harsh at Oracle

"Harsh is a very talented and a technical guy. His inputs were vital for automating EM interim patches in our automation framework. He addressed our questions very promptly. All the best."

— **Siva Chindaluru**, *Senior Manager, Oracle India Private Limited*, worked with Harsh at Oracle

"I interacted with Harsh for about an year in my role as the Program Manager for Oracle Enterprise Manager (EM) quarterly bundle patch programs. He has played considerable role in getting some of the key tasks delivered in a timely fashion to ensure the releases happen in the committed time frames. During these cycles, Harsh has exhibited commitment and 'can do' attitude. He has demonstrated hard work and perseverance to accomplish the assigned tasks. He has been very responsive in providing progress updates etc. which is important from the program management perspective. Overall, I am happy with the support he had extended. I wish Harsh good luck."

— **Ramamoorthy Govindarajan (Gram)**, *Senior Program Manager, Oracle Corporation*, managed Harsh indirectly at Oracle

"Harsh is one of the best among all people I have ever met. I had the privilege of working with Harsh on a couple of projects in the same company. Harsh is an open minded and precise developer. Multi-skilled, deadline oriented and eager. If you ever need someone to deliver under pressure, no slip-ups, just results, Harsh is your man! Lots of work and little talk. Deliver results and move on. That's Harsh's way. !!!"

— **Janarthanan Narasimmamoorthy**, *Technical Program Manager, Oracle India (BEA Systems)*, managed Harsh indirectly at Oracle

"As part of 'Fix Deliver Team', Harsh is the last stop to crank out fix. Harsh had demonstrated a high degree of integrity challenge and drive. He was always willing to work long hours and often had very limited time to work on building the patch to meet customer deadline."

— **Jamie Vuong**, *Customer Program Director, Oracle*, worked with Harsh at Oracle

"Harsh is a very knowledgeable software engineer, with a strong commitment on customer satisfaction and on deadlines. It's a true privilege to work with such dedicated people."

— **Mathieu Hornsperger**, *Senior Principal Support Engineer, Oracle Software*, worked with Harsh at Oracle

"I have enjoyed working with Harsh in the Enterprise Manager team. Harsh is a dedicated and committed software engineer and with strong skills in creating and delivering complex fixes and patches to customers. Also, from my perspective, he has taken quite a workload from customers demanding quick fixes, which he was able to respond promptly. I wish Hash all the best in his professional career."

— **Wagner Prata**, *Principal Technical Support Engineer, Oracle America, Inc*, worked with Harsh at Oracle
